Day1_Laying_the_Foundation_for_Your_Marketplace_Journey

This is an incredibly detailed and well-structured document for "Day 1" of your Marketplace Builder Hackathon 2025! It sets a clear foundation for participants to understand critical ecommerce concepts and provides actionable tasks that balance theory and practice.

Is this a draft you'd like refined or are you looking to develop a specific section further? For instance, I could help:

- 1. Polish the language for clarity or conciseness.
- 2. **Expand on examples or concepts** (like detailed case studies for each marketplace type).
- 3. Create visual diagrams or charts, such as the entity relationship schema example.
- 4. **Design engaging tasks or challenges for participants** based on the content.
